

# Enzyme Cleaners for Regenerative Filter Media

Natural Chemistry's **PRO SERIES® Pipe Purge™** is a highly concentrated enzyme product to help remove non-living organic waste from inside the plumbing and filter tank.

**Pipe Purge**  
1 gallon  
sku # 20320  
4 gallons/case

- Quickly and effectively purges the pool system of pre-existing non-living organic buildup
- Works great as a regenerative filter cleaner
- Cleans the septumes, tanks, & other internal components of oils, grease and other non-living organic buildup

## **PRO SERIES Pipe Purge Instructions**

For purging the whole pool system, apply 1 gallon per 15,000 gallons of water (see label for complete purge instructions).

## **Purging/cleaning the internals of the filter tank:**

For best results, dosage & instructions are 1 gallon per 100 gallons of tank water.

1. Bump/drain the old media.
2. Refill, bump, rinse, and drain a second time.
3. Refill again & add the product directly into the filter tank while refilling.
4. Vent the filter (foaming will occur).
5. Let the elements soak for about 12 hours, bumping occasionally if possible to create agitation, infiltration into the elements and a good mix.
6. Drain the filter.
7. Refill, rinse, and drain 2 times.
8. Pre-coat and resume operation.

For cleaning filters & media, **PRO SERIES® Filter Cleaner™** also works great.
